Continuation of Substance of Interview including description of the general nature of what was discussed: the Examiner proposed adding language to claims 1 and 10 establishing that the strut has at least a portion which overlaps the disc surface to better define over the prior art such as references that have aerodynamic air-strippers which could read on the claimed wing feature but don't have the wing feature supported by a strut which overlaps the disc to some degree. The examiner indicated that the structure he considered to correspond to the means plus function language of claim 19 would include such a strut feature. Applicant's Representative agreed to the proposed amendments. With entry of these amendments by Examiner's Amendment the application is in condition for allowance and prosecution is closed..
